

Gouthama Hegde

DevOps & Cloud Engineer

📍 Bengaluru, India ✉ gowthamhegde606@gmail.com ☎ 77601 90064 🌐 Gowthamhegde

Summary

DevOps & Cloud Engineer skilled in AWS, Linux, CI/CD automation, server deployment, and infrastructure management. Strong understanding of cloud architecture, containerization, networking, and monitoring. Experienced in deploying applications on AWS EC2, configuring scalable environments, and automating development workflows using Git, GitHub Actions, and shell scripting. Passionate about building reliable, secure, and cost-optimized cloud-native systems.

Education

B.E. Global Academy of Technology , Information Science	Bengaluru, India 2023 – present
Dip. Govt Polytechnic College Siddapura , Computer Science and Engineering	Siddapura, India 2020 – 2023

Experience

GTTC , Cloud Architecture Intern	Hubli, Karnataka Feb 2023 – May 2023 3 months
• Configured and deployed AWS EC2 Linux servers for cloud-hosted applications • Implemented IAM policies, security groups, and VPC components to enhance network security • Assisted in migrating workloads to AWS with scalability and cost optimization • Set up CloudWatch monitoring and alarms to improve system observability • Improved deployment workflows using Git and automated scripts	

Projects

Expense Tracker - Cloud Deployment

- Deployed PHP-based application on AWS EC2 with Apache and MySQL
- Automated environment setup using Bash and GitHub repository integration
- Configured security groups, SSH keys, and IAM for secure operations
- Implemented application monitoring using CloudWatch metrics
- **Skills:** AWS EC2, Linux, Apache, Bash, Git

YOLOv8 Object Detection App

- Automated Python environment setup using shell scripting
- Used Git for version control and workflow automation
- Optimized inference speed and model performance for real-time detection
- Integrated logging and structured output for debugging and monitoring
- **Skills:** Python, GitHub, OpenCV, Shell Scripting

Real-Time Air Writing Recognition

- Built an Air Writing Recognition system using computer vision and machine learning
- Automated Python environment setup using shell scripting
- Used Git for version control and workflow automation
- Optimized inference speed and model performance for real-time air-writing detection
- Integrated logging and structured output for debugging and monitoring
- **Skills:** Python, GitHub, OpenCV, Shell Scripting

Technical Skills

Cloud Platforms: AWS (EC2, S3, VPC, IAM, CloudWatch, Load Balancer, Auto Scaling)

DevOps Tools: Git, GitHub Actions, Docker, Terraform (Basics), Linux (Ubuntu, Amazon Linux)

Web Servers: Apache, Nginx

Programming Languages: Python, Bash, Java, SQL

Databases: MySQL, Cloud Storage (S3)

Core Competencies: AWS Cloud Architecture, DevOps & CI/CD Pipelines, Linux Administration, Infrastructure as Code, Docker & Containerization, Shell Scripting, Monitoring & Logging, Networking Concepts

Certifications

- AWS Associate Solutions Architect – EC2 & Cloud Services
- Introduction to Cloud Computing
- Fundamentals of Information Security
- HTML & CSS Web Development – TechA

Achievements

- Developed and deployed multiple cloud-hosted applications independently
- Improved server deployment speed through automation scripts
- Built hands-on projects demonstrating real-world DevOps workflows
